## NEW Blue Lens LED Spray Boom Work light

Vapormatic has introduced a NEW Blue Lens LED Work Light [VLD2200](#) to replace previous part number VLC2269, suitable for night time crop-spraying. Spraying at night offers major advantages; lower wind speeds help to minimize drift and lower temperatures reduce rates of spray evaporation.

To ensure that these conditions are advantageous, night-spraying requires effective illumination of the spray boom, in turn allowing the operator to monitor correct functioning of nozzles and spray patterns from the cab.

The NEW Vapormatic [VLD2200](#) Blue Lens Work Light has a combined Flood and Trapezoidal beam pattern to ensure clear illumination of the nozzles and spray pattern. The unit is lightweight yet durable and requires **less installation time, less investment cost** and is **much easier and quicker to clean** when compared to 48 or 72 individual crop sprayer nozzle lights.

### Features:

- Blue Lens LED – Easy to monitor nozzles and spray patterns
- Large LED optics provide close-working flood and spot trapezoidal lighting
- IP69K rated – ideal for repeated high pressure wash-down & dust ingress
- Lightweight carbon body ideal for fitment along the spray boom
- Stainless-steel fixing brackets with anti-vibration resistance
- 100,000 hours working life
- Easy-to-wire low voltage lighting

### Specifications:

- 1000 Lumens
- 4 x 9W LED's
- IP69K Waterproof rated
- 12/24V

### Measurements:

- 90mm x 90mm
- M10 Bolt

All Vapormatic quality replacement parts carry an industry leading **12 month parts and labour warranty**. For further information on specific items please visit [www.vapormatic.com](http://www.vapormatic.com)
